  - b. Project's symbol
  - c. Project's decimal
  - d. Project's official site
  
6. **ROADMAP**
  
7. **PAHOO SUMMARY**

## INTRODUCTIONS TO PAHOO

### a. Opening warm regards

First of all, thank you to the readers of this whitepaper. pahoo for creating a resource with several different jobs, both currency exchange and gaming site and advertising site. Everything in one name.

We are so happy that we can finally establish what we have worked for to the world. With great interest in crypto work and the blockchain technology we going to bring pahoo to the interest of crypto hunters.

### b. Bringing pahoo to you

We have great love for the blockchain industry, we have the mindset to set a legacy. These things brought us to what we are now. An industry with love for Crypto. Before we go further let's try to explain what blockchain means.

*A blockchain is, in the simplest of terms, a time-stamped series of immutable records of data that is managed by a cluster of computers not owned by any single entity. Each of these blocks of data (i.e. block) is secured and bound to each other using cryptographic principles (i.e. chain).*

*So, what is so special about it and why are we saying that it has industry-disrupting capabilities?*

*The blockchain network has no central authority — it is the very definition of a democratized system. Since it is a shared and immutable ledger, the information in it is open for anyone and everyone to see. Hence, anything that is built on the blockchain is by its very nature transparent and everyone involved is accountable for their actions.*

## PROJECT STEPS

You will get more familiar with the unique features by studying the details in the next section. Just follow it step by step.

### a. Currency exchange

Our currency exchange will be built in partnership with a large currency exchange.

This makes us the first step to having our customers.

We do our job by supporting Fiat currencies that will have our own customers.

This is a measure we have set in order to help us achieve our goal.

### b. Game sites

The game site makes us multi-level referral. This will have a lot of customers and also if you don't have the budget you can play with referrals. It's a win-win, goal-goal institute. This a way to make sure that all get what is theirs.

We also intend to build special games that are not or very unlikely to play with crypto. just like other projects have tried developing such, we want to improve and add more to the crypto field. Please we will like to make it clear that we are not in any way competing with them, we are just trying to set a legacy, what we promised.

### c. Advertising site

Of the few sites dedicated exclusively to crypto.

From currency exchanges, ico and ieo to miner machine sales.

The advertising site will be divided into free and paid sections, where the paid section will use its own packages for better visibility.

Regional, age, and gender specific search capabilities make it easier to find your specific customer or seller.

Our advertising site also runs a liaison section for some facilities that do not require physical presence.

There will also be a referral system for our advertising site so users can collaborate and earn money.

# PAHOO

What do you think, is it not a win-win as we said earlier?

Let's progress through.

## **OPINIONS FROM EQUAL PARTS IN OUR PROJECT**

### **a. Customer's view**

From the customer's point of view, we need to provide them with good quality currencies and help them make money by holding lotteries and Airdrops.

We will distribute some of that currency to Airdrop among users from all tokens that are listed on our currency exchange.

### **b. Project Owner's View**

We will not act like the rest of the projects. We will get a heavy number to list at the beginning, but we will get some success from ieo.

That is, in return for what we do.

We do not use bot trading at all to have a fake and unrealistic volume

## **PROFITS IN PAHOO**

The amount of our token is 888,000,000, and by buying 1% of the token monthly and burning it and continuing to reach 80 million tokens. We are making investors, especially early investors, profit from investing in our token.

We will also spend lots of our site marketing revenue, also listing our tokens on reputable exchanges to make them available to everyone.

This way the true crypto world can be opened to everyone to see. This is part of our mission, and this we must achieve, with your supports.
